Departmental Summary S-2

During the reporting period Marine Helicopter Transport Group 36 Intelligence Section was busy bringing up to date the files and regulations after several months of being in an inactive status. Lack of storage space for Classified Material required a very complete check on need and requirement of helicopter usage.

S and C Files have been assigned this office until such time as qualified personnel can be trained to handle classified material for the Group.

The World Situation Map was kept up to date by clippings from newspapers. This map is readily accessible to all hands, being near the Group Coffee Mess.

Three (3) enlisted men were sent to Alameda Naval Air Station, Alameda, California to attend Air Intelligence School.

Clearances were checked on all officers in accordance with MCM Memo 51-53 of 22 July 1953.

Departmental Summary S-3

During the reporting period the Operations Section insured that all helicopter commitments were carried out. These various commitments were assigned to the tactical squadrons and appear in the Chronological Narrative.
